

Outside Plant

Bend Management

Outdoor & Indoor

L & T shapes

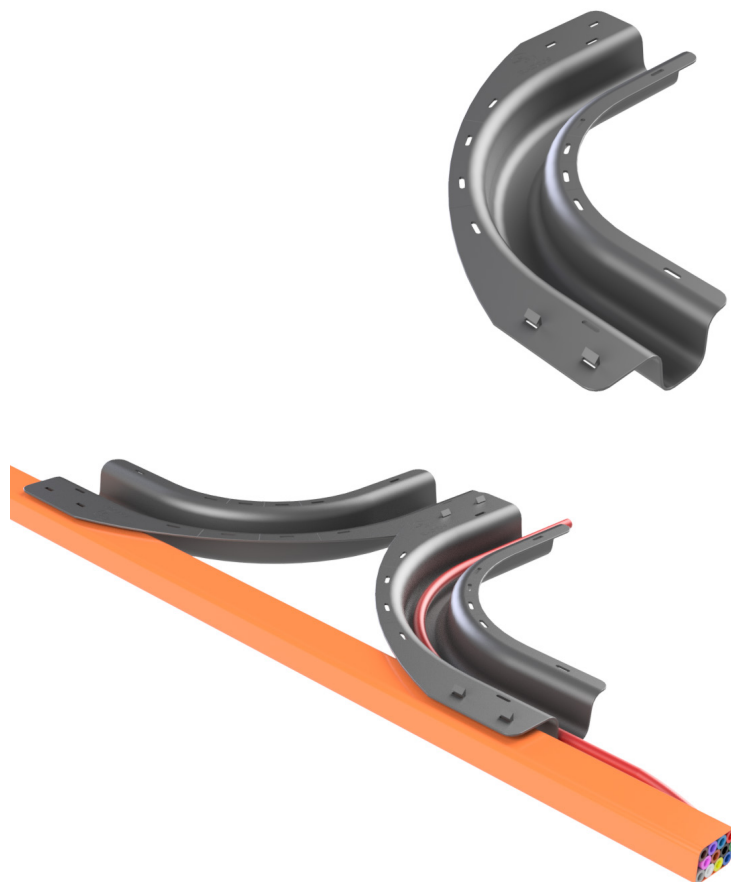

Description

This bend limiting device provides a safe bend pathway for microducts to the customer or distribution box and is suitable for direct burial into the ground.

It can be used either to route a single tube or for branching off a single tube from multitube assembly.

It is designed for use with tubes up to 25mm O.D. which can be simply placed into the L - shape bend management and held in place with cable ties.

The bend limiter is also available as an interior version and complies with V0 according to UL 94 standard.

Technical
