 - Installation guide

Standard sizes
(mm)
53.9
96.5
110

Assembly Instructions

1. Damaged section of primary duct is cut away exposing the cable.
2. Assemble the split collars and suitably sized duct liners at each open end of the main duct.
3. Each half of the split duct is placed around the exposed cable and the split collars.
4. The supplied cable ties are then tightened around the duct to preserve the duct form.
