

Twinwall Duct Systems

Repair Kit 63mm

Description

The Twinwall Duct Repair Kit is used to repair 63mm. Twinwall duct which has cable already installed.

Twinwall Repair Kit is supplied in 3m lengths.

Kit Description

- 3m length of split 450N 63mm Twinwall
- 24 pre-fitted dowels
- 2 off 300mm split oversleeves
- 8 off cable ties
- documentation

Assembly Instructions

1. Damaged section of primary duct is cut away exposing the cable.
2. Each half of the repair kit is placed around the exposed cable and aligned by the pre-installed dowel pins.
3. The supplied cable ties are then tightened around the duct to preserve the duct form.
4. The supplied oversleeves are placed around the joint between original ducting and duct repair kit to complete the repair.
