CTS

# B125 Covers Recessed

## Design Features

Radius CTS high quality recessed covers with fabricated steel frame, are suited to external applications and designed to be filled with a variety of hard landscaping products typically a block pavior or slab infill (e.g cobble setts, concrete, tarmac or natural stone products).

Frames, covers and cross pieces are manufactured from 6mm rolled steel to BS 1449 and hot dipped galvanised to BS EN ISO 1461

Manufactured to BS EN 124, load rating B125

Suitable for installation in pedestrianised areas, public open spaces, retail parks and any other area subjected to slow moving vehicles (EN124, Group 2)

Cover sides are tapered, ensuring ease of removal

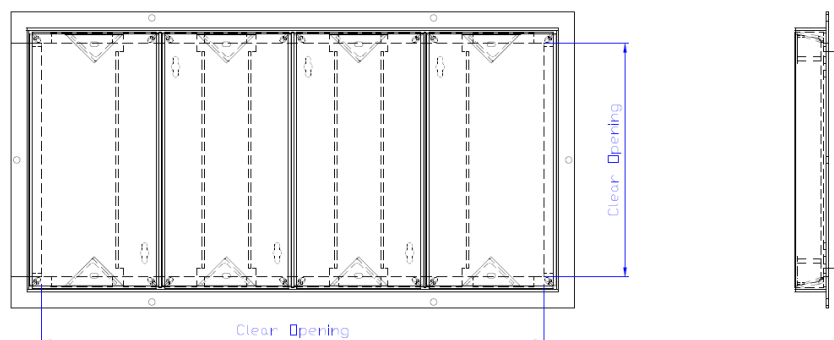

Lifting points for safe removal of covers
