Access Chamber Grating & Sump

Description

Radius offer a range of furniture and accessories to complement their Radbox™ and Quadbox™ access chambers. These include furniture for cable management, safe access, duct entries and drainage.

The Radius Grating and Sump provides a solution for a preformed sump/soakaway area to be installed in the base of a chamber.

The sump is designed to allow a pump location so all water can be evacuated from the chamber before works are carried out.
