# Repair Kit 63mm

### Description

The Twinwall Duct Repair Kit is used to repair 63mm Twinwall duct which has cable already installed.

Twinwall Repair Kit is supplied in 3m lengths.

### Kit Content

- 3m split length of 450N 63mm Twinwall
- Pre-fitted dowels
- 2 No. couplers
- 8 No. cable ties
- Documentation

### Assembly instructions

1. Damaged section of primary duct is cut away exposing the cable.
2. Each half of the repair kit is placed around the exposed cable and aligned by the pre-installed dowel pins.
3. The supplied cable ties are then tightened around the duct to preserve the duct form.
4. The supplied couplers are placed around the joint between original ducting and duct repair kit to complete the repair
